One Youth

Summer 2018 Release

The following changes have been made for the One Summer 2018 release (3.66):

Asset Plus Stage

Concerns regarding specific known victim

Core Record > Alerts and Flags > Concerns regarding specific known victim.

The YJB maximum length for this field is 70 characters, on Internet Explorer version 11, when entering the text the system will stop at 70 characters.

The screenshot shows the 'assetplus' interface. On the left is a navigation menu with categories like 'Core Record', 'Alerts and Flags', and 'Offending and Anti-Social Behaviour'. The main content area is titled 'Core Record: Alerts and Flags' and contains several sections: 'Risks and concerns' with fields for RDSH judgement, YOGRS, Likelihood of reoffending, and Assessed as a risk to children; 'Previous safeguarding or public protection incidents?' with a dropdown menu; 'Overall safety and wellbeing concerns' with a table for 'Risk of self-harm' and 'Risk of suicide'; and 'Concerns regarding a specific known victim' with a text input field and an 'insert' button. The text input field contains the text: '04/01/2018 By Danny Jones Automation Testing Alerts and Flags'.

On older versions of Internet Explorer, the system will allow you to type beyond 70 characters, but when saving the following error message displays:

The screenshot shows the same 'assetplus' interface as above, but with an error message dialog box overlaid. The dialog box has a yellow warning icon and contains the text: 'Concerns regarding a specific known victim - a maximum of 70 characters can be entered.' The background shows the 'Staff safety concerns/considerations' field with an 'insert' button. The text in the field is: '04/01/2018 By Danny Jones Automation Testing Alerts and Flags'.

Youth Justice Youth Offending Team Analytical Changes

Ref 86/CLD02, Inclusion of CJS code in CLD

Ref 86/CLD03, New Psychoactive Substances (legal highs)

For the defined simple type “Substance”, the enumerated value of “Legal Highs” has been changed to “Psychoactive Substances (legal highs)”.

Ref 104/CLD35, Living arrangements / Accommodation type

This element has been changed from freeform to dropdown as per YJB specification.

Historic data will be shown as “other” for any previous entry. If there is a need to record specific information, use the Living arrangements and Environmental factors.

Spring 2018 Service Pack 1 Release

The following changes were made for the One Spring 2018 release Service Pack 1 (3.65.100):

Performance Enhancements

YJ Case View

- In previous intervention programmes, these are only loaded on demand.
- Within AssetPlus, this only returns essential data with the option to load 'more' view on demand.
- Reduced waiting time when populating stage history.

Client/Case View

- Faster loading of the YJ Case view, when the user is a YJ user.
- Optimise calls to the One Application server.
- Reduction in the calls to the One Application server to retrieve only the shared data it requires.

Database Indexes

- Improve the database indexes to speed up database calls.

Other Defect Fixes

KB-478693

YJ - AssetPlus drug entry with an apostrophe is not saving correctly.

KB-478036

IYSS – when multiple users are using the **Bulk Update** functionality at the same time, the results are displaying from one user to another.

KB-467925

IYSS – when copying a URL into the Text Message field to be sent to a client, the system crashes.

KB-478269

YJ – The **Submissions** page times out before it is displayed.
