# 02 | Introduction

## Overview

The School Admissions portal enables schools to view and modify some applications data directly, benefitting both the LA and the school. Schools can use the portal to:

- View application and allocation information.
- Rank applications directly within the One database (OAA schools only).
- Respond to in year applications to your school.
- View a list of active applications in which the parent/carer has claimed that a sibling attends the school and verify that information.
- View whether students who are due to leave at the end of the academic year have submitted an admissions application yet and see the leaver's likely destination base.

## Using this Handbook

This handbook is intended for administrators at the Local Authority and schools. It describes the administration tasks performed by the Local Authority, as well as the processes performed by the school itself.

This document is split into four sections:

- **Introduction**
- **Managing Your User Account** – covers account activation and housekeeping.
- **Configuration** – covers the Provider Portal's text configuration, portal setup and user account review features.
- **Using the School Admissions Portal** – covers the specific School Admissions Portal features – viewing applications, applications and leavers, editing ranks, and verifying claimed siblings.

## Admissions Transfer File

**Admissions Transfer File** is sent from a Local Authority to the schools in that Local Authority. The ATF file contains details of students to whom offers will be made. The file is in the same format as the CTF file (Common Transfer Format file) except that:

- An ATF file may not contain a UPN (Unique Pupil Number) if the student either does not currently have one or the number is not known to the sending Local Authority.
- ATF files must contain an application reference number.
- ATF files do not include containers for assessment (attainment) or attendance information. When a file is created in March, it does not include any Key Stage 2 data. Any attendance data only relates to the period up to the date that the file is created.
- The contacts included in the ATF file are restricted to the applicant (the person who applied for the school place) as the first contact (or equal first) and then any contact from the Local Authority database who has parental responsibility.

The ATF file export process also exports active v4 SEN assessment involvements for those Local Authorities that have migrated SEN to v4.

### ATF Download

**ATF Download** is available on the landing page of School Admissions. This feature allows Schools to download the file from the School Admission Portal sent from their local authority for the following groups:

The **Applications** page enables you to perform the following tasks:

- View a list of applications made to your school for a selected transfer group.
- Respond to in year applications made to your school.
- Rank applicants and edit student band details (OAA receivers only).

The page displays a **Receiver Summary** panel. The information displayed in the receiver summary changes depending on whether you are dealing with an in year or normal phased transfer group, and whether the **Publicise** date has passed yet. For more information see [Appendix: Receiver Summary](#) on page 33.

The screenshot shows the 'Receiver Summary' interface. At the top, it displays 'PAN: 0' and 'Applications: 3 ( 1st Pref: 1 2nd Pref: 2 )'. Below this is a search bar with 'Next' and 'Download' buttons, and options for 'Show/Hide columns' and 'Choose sort order'. A filter section shows 'Filter: All offer statuses, All Preferences, Verified and unverified applications' with dropdown menus for 'All offer statuses', 'All Preferences', and 'Verified and unverified applications', along with a 'Clear Filters' button. A date range filter is set to 'applications added between' with a date picker set to '23/10/2018'. Below the filters is a table with columns: Preference Number, Offer status, Student name, DeB, Gender, Student ID, Application reference, Application verified, Current school, Catchment, Address, and Postcode. The table contains three rows of data, with the first row showing '1 Not yet processed' and the second and third rows showing '2 Allocated' and '2 Provisional' respectively.

**NOTE:** The **View Applications** hyperlink is only displayed for active normal transfer groups that your school is a receiver for. You must have at least read permissions to the School Admissions - View Applications & Allocations or read-write permissions to the School Admissions – Ranking business processes to see the link. The **View Applications** hyperlink is not displayed if your school is part of a sub group that has the **Hide in School Admissions Portal** check box enabled in the Transfer Group | Sub Groups.

Once you have opened the **Applications** page, you can perform the following optional actions:

- If your school uses banding, select a band from the **Band** menu to filter the list by band.

**NOTE:** If you select a parent band, all students associated with the child bands (including bands at multiple levels, e.g. level three child bands as well as level two child bands) are displayed, as well as those students who are directly associated with the parent band.

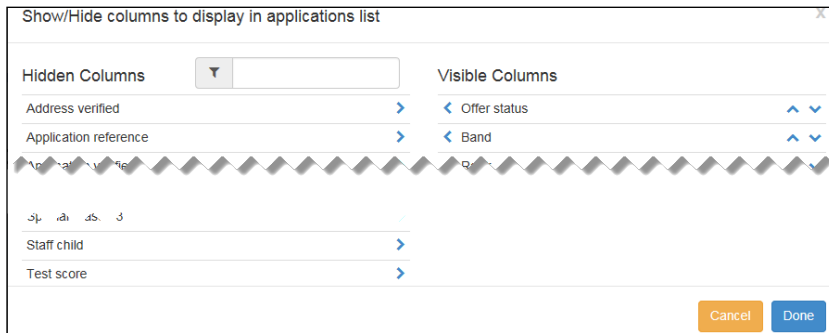

Students associated with multiple child bands are listed more than once.

- Enter a student name or ID into the search field on the left to highlight a particular student in the list.
- Select an offer status from the **All offer statuses** menu to filter the list by offer status.

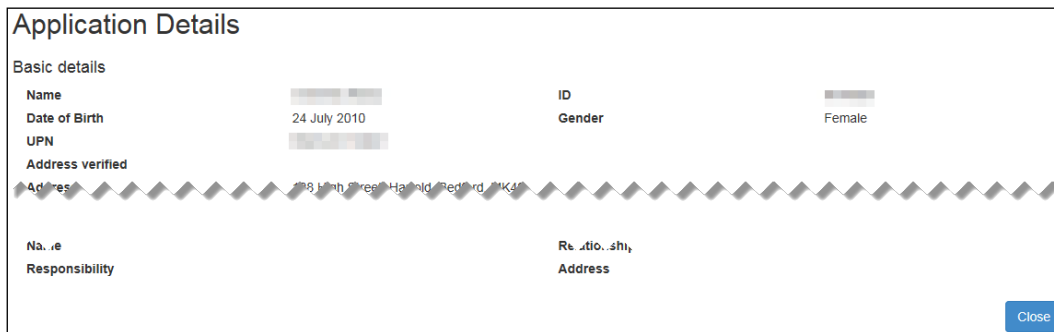

**NOTE:** For normal phased transfer groups, if the group's **Show Offers to Receivers** date is populated, then the offer status filter option is only available on and after that date. If the **Show Offers to Receivers** date is not populated, then this filter option is only available on and after the **Transfer Group Publicise** date.

The offer status filter is available for in year transfer groups at all times.

- Use the **Show/Hide columns** menu to edit the information displayed about each applicant:
  - i. Click the **Show/Hide columns** button to display the **Show/Hide columns** dialog.

- ii. Click the names of any of the columns in the **Hidden Columns** list that you wish to make visible. The column names are transferred to the **Visible Columns** list.
  - iii. Click the names of any of the columns in the **Visible Columns** list that you wish to hide. The column names are transferred to the **Hidden Columns** list.

  - v. Click the **Done** button to save your changes and close the dialog.
- Click the **Download** button to export the list of applicants and all displayed data as a .csv file.
  - View further details of a particular student's application by clicking on the student's name.

## Responding to In Year Applications

The School Admissions Portal enables you to update the offer statuses of in year applications. You must have the School Admissions - Update In Year Offer Statuses business process set to read-write in order to be able to edit offer statuses.

**NOTE:** Editing the offer status of a particular in year preference does not automatically update the overall application status. If required, you should use A&T Back Office to update application statuses.

1. From the School Admissions Portal home page, click the **View Applications** hyperlink for the in year transfer group you wish to view. A list of open applications for your school in that transfer group is displayed.

## Editing Ranks

Own Admissions Authority (OAA) schools can use the School Admissions Portal to rank students and, if applicable, add or remove students from bands.

For users who are mapped to OAA bases, only Applicant preference reasons will be shown for Catchment, Feeder and Distance.

For users who are not mapped to OAA bases, only LA preference reasons will be shown for Catchment, Feeder and Distance.

The version of the **Applications** page displayed to OAA schools features the same **Show/hide columns** and **Download** functions that non-OAA schools see (as discussed in the [Viewing Applications](#) topic). However, OAA schools see additional buttons, enabling them to **Choose sort order**, **Rank list in current order**, **Assign to band** and **Remove from band**.

The School Admissions Portal enables you to edit student ranks in two ways. You can assign ranks either by entering rank numbers manually or by sorting the list of students a particular way and then clicking the **Rank list in current order** button.

**NOTE:** You can only edit ranks for transfer groups that do not have the **Prevent OAA Ranking Online** check box selected in **A&T Back Office | Process | Transfer Groups**. This flag enables you to ensure that ranks are not updated at an inappropriate time.

For more information on the **Prevent OAA Ranking Online** flag, see the **Transfer Group Details** topic of the **A&T Back Office help**.

## Assigning Ranks Manually

- From the School Admissions Portal home page, click the **View Applications** hyperlink for the transfer group you wish to view. The **Applications** page is displayed.

## Banded Receivers

When viewing banded receivers in the **Applications** screen, the **Receiver Summary** panel initially displays much of the same information that it would for a non-banded receiver. However, the **Ranked** and **Unranked** totals are not displayed, because there are no ranks at the overall preference level for banded schools. Instead, all ranking takes place within bands.

Once a band has been selected, the information displayed in the **Receiver Summary** panel is calculated differently depending on whether you are viewing a parent or non-parent band.
