02 | Overview

The School Admissions area of the Provider Portal is highly customisable, with most labels and textual content editable via the **Administration | Site Setup | Text Customisation** menu.

Customising this content helps you to ensure that the advice and instructions given to applicants meet your LA's policies and guidelines.

Customising School Admission Portal Text

To customise the School Admissions Portal text elements:

1. Sign in to the Provider Portal.
2. Select **Administration | Text Customisation** to display the **Text Customisation** page.

The screenshot shows the 'Text Customisation' interface. At the top, there is a dropdown menu labeled 'Choose a text Category' with 'About' selected. Below it is a search bar with the text 'or Search' and a blue 'Search' button. There are two tabs: 'Default' (selected) and 'Welsh'. At the bottom left, there is a blue 'Add' button.

3. Select **School Admissions Text Resources** from the **Choose a text Category** drop-down menu to display the School Admission Portal text elements.

The screenshot shows the 'Text Customisation' page with 'School Admissions Text Resources' selected. There are two tabs: 'Default' (selected) and 'Welsh'. A blue 'Edit' button is visible. Below is a table with two columns: 'Name' and 'Value'.

Using This Document

This document shows each of the screens and dialog boxes in the School Admissions Portal area of the Provider Portal. Editable text areas are highlighted in red and numbered. The table below each screenshot lists the name of each individual element, which you can then look up and edit in the **Text Customisation** page, if required.

In cases where a particular area of the screen may display different text elements at different times, the tables show all available elements for that area. For example, the coloured bar at the top of the **Applications** page may display multiple error or status messages, all of which are listed under the same number.

Where a particular text area displays a tooltip when you hover your cursor over it, the text element for that tooltip is displayed in the tables in italics.
