## 02 | Installation Instructions

### Download and extract the zipfile

Click on the hyperlink from the notification (either on ServiceNow or by email) and download the NccisCheck-Setup-x.x.xx to the desired location (where x.x.xx is the version number). Double-click the zipfile to extract it.

### Run the installer

The installer creates a folder **%LOCALAPPDATA%\NccisCheck** and puts a launcher app into it. It will also create a subfolder **app-x.x.xx** (where x.x.xx is the version number) which contains standard executable files/DLLs. The launcher works out the newest version to launch and will create a new (or maximum of two) subfolder(s) and extract into there.

### Run the app

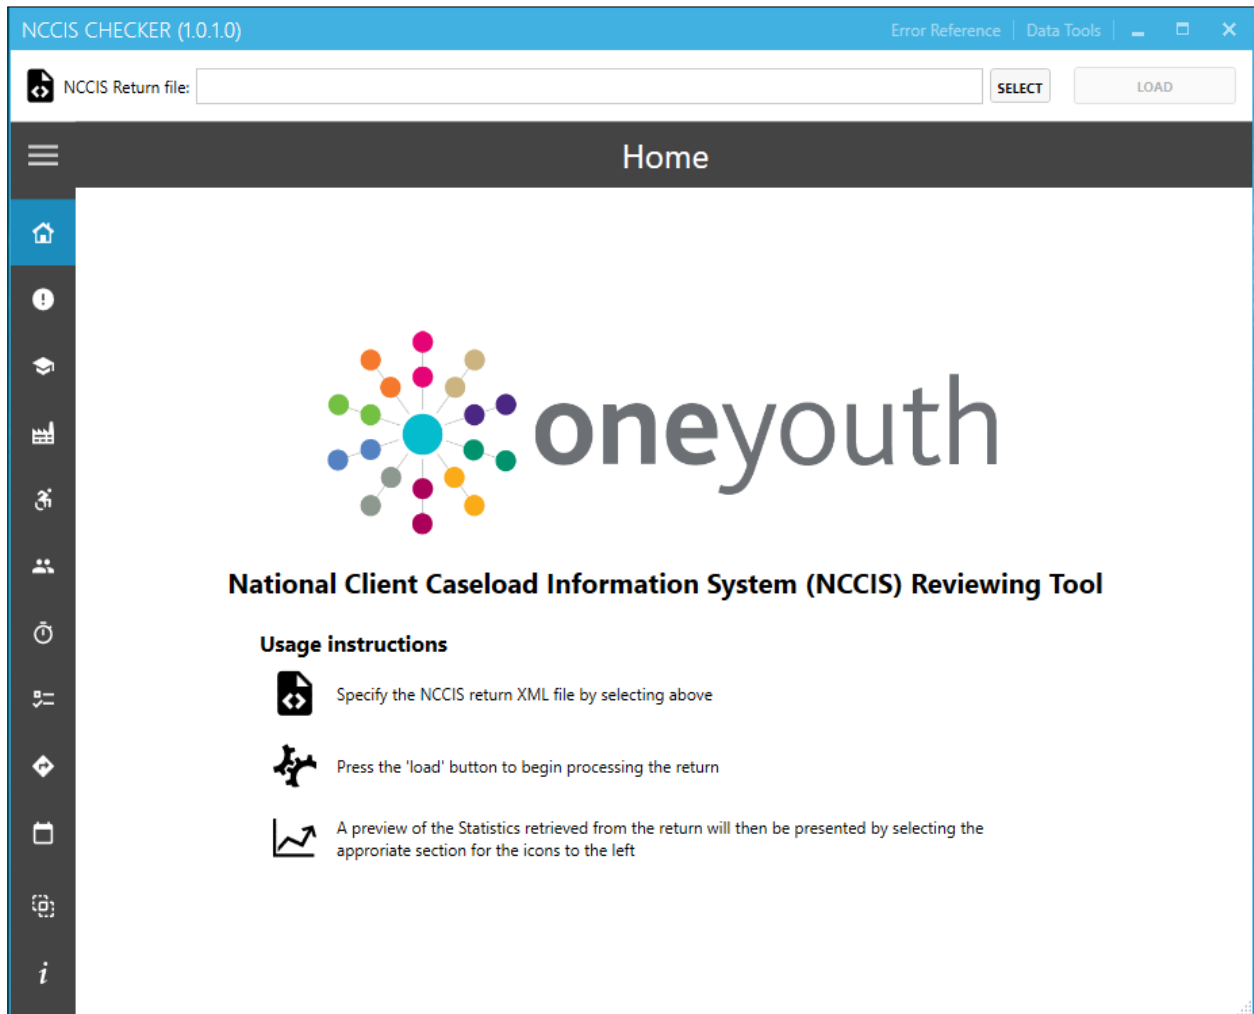

On the Start Menu look for **NCCIS Checker** or double-click the icon on the desktop.

### Uninstall the app

Left click on **NCCIS Checker** from the Start Menu and select **Uninstall**. This launches **Add/Remove Programs**. Select **NCCIS Checker** and **Uninstall** to remove the software.

## Table information

Each screen from the navigation bar displays the data in a table format. The tables have different columns depending on the type of information displayed. The tables will mirror those in the NCCIS workbooks, for example:

	Year 12	Year 13	Year 12 - 13 Total	Year 14	Year 15	Year 16+	Total
Cohort Total	78	54	132	33	26	38	229

Most tables contain the following sections with a breakdown of data under each heading:

<b>In education, post Year 11</b>
<b>Employment</b>
<b>Training</b>
<b>Training (Re-engagement)</b>
<b>NEET Group</b>
<b>Available to labour market</b>
<b>Not available to labour market</b>
<b>Other (not EET or NEET)</b>
<b>Current situation not known</b>

## Data Tools

There are additional data tools available to reformat the XML file for manual editing. To access this facility, click the data tools hyperlink in the top right corner.

### NCCIS Data Tools

The XML file generated for the purposes of NCCIS returns was not intended for manual editing, however, using this facility, the XML can be reformatted to make it easier to edit within a text editor.

Input File:  ...

Output:  ...

Tidy XML output:

Remove clients in Cohort-X:

Fix duplicate header issue:

Use filename from Input file:

Remove Personal Data from output:

Append date and time to filename:

#### OUTPUT DETAILS

Output file will be:

**Tidy XML output:** - Enables the file to be edited if required in a text editor.

**Remove clients in Cohort-X:** - Users can remove clients that are reported as Cohort X in their NCCIS Return XML. This can be done by specifying the XML file to remove Cohort X clients from. Tick the checkbox and then **Save Changes**. This functionality will remove all clients reported as Cohort X in the output XML file.

**Fix Duplicate header:** - Used to fix if the file header is duplicated. If you don't have that error, it does nothing.

**Remove Personal Data:** - This provides the facility to redact personal data, useful to send an XML file to Capita.

In all instances a new file will automatically use the file path where the original xml file is located. You will see the original plus the new file (See output details in screenshot above). To use this new file, choose the file and load, as before.

# 04 | Errors

Once the checker has processed the XML, the errors page displays. This will show any errors with the XML, displaying the code, priority, record count, Records, description and explanation. Any minus codes are Capita codes to help with fault investigation, any others are NCCIS error codes.

If a local authority is responsible for two authorities in one return the **Show all records** is the default view but use this to select individual authority. (Not present on single authority)
